

QMainWindow

```
classDiagram
    QMainWindow <|-- MainWindow
    class QMainWindow {
    }
    class MainWindow {
        +CANVAS_SIZE
        +ITEM_ICON_SIZE
        +ITEM_MOVE_STEP
        +MainWindow()
        +~MainWindow()
    }
```

The diagram illustrates a class hierarchy where MainWindow inherits from QMainWindow. QMainWindow is represented by a white box with three empty compartments. MainWindow is represented by a grey box with five compartments: the first for the class name, and the following four for attributes and methods. A blue arrow with an open triangle head points from MainWindow to QMainWindow, indicating inheritance.

MainWindow

+ CANVAS_SIZE

+ ITEM_ICON_SIZE

+ ITEM_MOVE_STEP

+ MainWindow()

+ ~MainWindow()
